JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 334 Nos. 1 and 2 4 SEPTEMBER 1992

CONTENTS

Theory and application of analytical spectroelectrochemistry with long path length spectroelectrochemical cells. Part II: non-linear regression analysis of analytical spectroelectrochemical data for estimation of electrochemical parameters
W. Wanzhi, X. Qingji and Y. Shouzhuo (Changsha, China) 1

Exact solutions of transport in a binary electrolyte
Y.S. Choi (Storrs, USA) and K.-Y. Chan (Hong Kong) 13

Fabrication and electrochemical features of new carbon based interdigitated array microelectrodes
H. Tabei, M. Morita, O. Niwa and T. Horiuchi (Ibaraki, Japan) 25

Polypyrrole film electrodes electrochemically doped with tetrathiomolybdate anions: preparation and characterization
F. Girard, S. Ye, G. Laperrière and D. Bélanger (Montréal, Canada) 35

Potential step chronoamperometry at the wall-jet electrode: experimental
C.M.A. Brett, A.M.C.F. Oliveira Brett (Coimbra, Portugal), A.C. Fisher and R.G. Compton (Oxford, UK) 57

Microfabricated gas-diffusion electrodes
T.K.L. Tang and K.-Y. Chan (Hong Kong) 65

Effect of the ohmic potential drop on the onset of current oscillations at the transition between active and passive states of a cobalt electrode in phosphoric acid solutions
M. Pagitsas and D. Sazou (Thessaloniki, Greece) 81

Reaction of inflammation inhibitors with chemically and electrochemically generated hydroxyl radicals
M.A. Oturan, J. Pinson (Paris, France), J. Bizot, D. Deprez and B. Terlain (Vitry sur Seine, France) 103

Electrochemically controlled transport of potassium chloride across a conducting electro-active polymer membrane
H. Zhao, W.E. Price and G.G. Wallace (Wollongong, NSW, Australia) 111

Bioelectrochemical responses of the polyaniline uricase electrode
S. Mu, J. Kan and J. Zhou (Yangzhou, People's Republic of China) 121

Characterisation of the n-CdS/polysulphide interface by intensity modulated photocurrent spectroscopy
P. Herrasti, R. Peat and L. Peter (Southampton, UK) 133

Zeolite matrix effects on the electrochemistry of metal hexacyanoferrates
S. Bharathi, K.L.N. Phani, J. Joseph, S. Pitchumani, D. Jeyakumar, G.P. Rao and S.K. Rangarajan (Karaikudi, India) 145

The electrochemical reduction of halothane. Part 1. A mechanistic study
A.R. Mount, M.S. Appleton, W.J. Albery, D. Clark and C.E.W. Hahn (Oxford, UK) 155

The cathodic scission of aromatic derivatives in the presence of nitrones as spin markers: on the reactivity of transient nitroxides in weak H-donor solvents. Part 2. On the cleavage of aromatic sulphones and halides in benzonitrile
J. Simonet, M.C. El Badre and M. Cariou (Rennes, France) 169

Strategies for reducing ascorbate interference at glucose oxidase modified conducting organic salt electrodes
J.P. Lowry and R. D.O'Neill (Dublin, Ireland) 183

Investigations of hydrolysis kinetics of atropine sulphate by electroanalysis at the water/nitrobenzene interface
E. Wang, Z. Yu and N. Li (Changchun, People's Republic of China) 195

Facilitated sodium transfer from aqueous electrolytes to resistive media
Y. Shao and H.H. Girault (Edinburgh, UK) 203

Liquid junction potential between different solvents. A junction with an alkali metal salt as electrolyte
K. Izutsu, T. Nakamura and Y. Aoki (Matsumoto, Japan) 213

Passivation of tin in citrate buffer solutions
M. Šeruga and M. Metikoš-Huković (Zagreb, Croatia) 223

A quantitative study of cross-linking in electrodeposited carbazole films using tetrabutylammonium tribromide bromination and XPS analysis
A. Desbene-Monvernay, P.C. Lacaze and M. Delamar (Paris, France) 241

Thin polymeric films of metal-dibenzotetraaza[14]annulene by electropolymerization of some γ,γ'-disubstituted complexes. Part 2. Copper complexes *
A. Deronzier and M.-J. Marques (Grenoble, France) 247

Dependence of the flat-band potential of n-type GaAs on the redox potential in methanol and acetonitrile
B. Ba, B. Fotouhi, N. Gabouze, O. Gorochov (Meudon, France) and H. Cachet (Paris, France) 263

Theory of equilibrium potential involving order–disorder transition at polyaniline-coated electrodes
K. Aoki (Fukui-shi, Japan) 279

Electrochemical behaviour of squaric acid on single-crystal platinum electrodes with basal orientations in aqueous sulphuric acid medium
R. Albalat, J. Claret (Barcelona, Spain), J.M. Orts and J.M. Feliu (Alicante, Spain) 291

Growth of compact layers at the interface. Part VI. Adsorption properties of difenzoquat herbicide (1,2-dimethyl-3,5-diphenyl-pyrazolium)
L. Pospíšil, J. Hanzlík (Prague, Czechoslovakia), R. Fuoco and N. Fanelli (Pisa, Italy) 309

Electrochemical behaviour of Pt(111) in alkaline media. Effect of specific adsorption of anions
E. Morallón, J.L. Vázquez and A. Aldaz (Alicante, Spain) 323

Electron transfer mechanisms of flavine adenine dinucleotide at the glassy carbon electrode; a model study for protein electrochemistry
M.F.J.M. Verhagen and W.R. Hagen (Wageningen, The Netherlands) 339

Short communications

Mass transfer effect in hydrogen evolution reaction on Pt single-crystal electrodes in acid solution
H. Kita, S. Ye and Y. Gao (Sapporo, Japan) 351

Significance of the apparent limit of anodic oxide film formation at Pt: saturation coverage by the quasi two-dimensional state
G. Jerkiewicz, G. Tremiliosi-Filho and B.E. Conway (Ottawa, Canada) 359
